

reduction of the staff.

2). There is no initiative of the local government and these ~~pe~~ unemployed people.

If they have the initiative and organization, I am sure there is something to do.

For instance: ~~to~~ vegetable growing, or grain growing, ~~private~~ production and service ~~and~~ so on.

Q 10. 24

I do hay-making for our use, but I don't cut the green tree.

This is related first with the traditions that cutting the green plants is bad for the nature, second it corresponds to the conservation of the environment.

For fuel we use old, dried trees or dropped by the nature etc.

Q 10. 24

I don't hunt. My opinion about the hunting is that, it should be done under certain conditions and time for specific aim by specialized hunters.

In our sum the mostly hunted animals are marmota.

There some reasons, but recently the main reason is becoming the fur. So, hunting of this animal is becoming disorderly.

Q 3. 25

I think, there is no notifying influence on the number of wild life. I haven't heard about it.

Even I think that, some of animal are becoming more. For example the marmota.

Generally, the hunters in our sum are few. As I know there are 18 persons who are the member of the hunting association.
